INDEPENDENCE

Safe Bath has been designed to allow easy access for people who are presently having difficulty getting in and out of a regular bath tub. If a person is capable of walking with a walker, they will have no trouble getting into this tub.

SAFETY

Safe Bath has a built-in no slip surface on the floor and the seat.

The seat and seat back are molded to allow maximum support and comfort.

Safe Bath is supplied with a complete set of pressure balancing scald taps. This scald guard tap can be adjusted for maximum temperature setting to prevent burns, and for even temperatures when other water outlets are used at the same time.

A pop-up drain valve with a built-in overflow prevents danger of overflow. An external drain is supplied to prevent flooding.

COMFORT

Safe Bath has been designed with a maximum comfort in mind. The molded seat and seat back offer maximum support.

The sides are at a very comfortable height providing support for your arms.

A hand shower is supplied with each unit for your convenience.

Safe Bath's unique design allows you to sit in water to chest level if so desired.

EASE OF OPERATION

In many cases, a person who has needed assistance will now be able to bathe by himself or herself. All controls, such as the tap, the hand shower, the pop up drain and the door closer are within easy reach.

EASY INSTALLATION

No major renovations are required. Safe Bath is a self contained unit. It can be installed in any convenient location in the home.

All plumbing fixture are supplied with the Safe Bath.

The Safe Bath will pass through any 30 inch door opening – 28" with jam removed

SAFETY BATH IS SUPPLIED COMPLETE WITH...

- Stainless Steel Door Closure
- Stainless Steel Hinges
- Stainless Steel Spout
- Pop-up Waste Drain with Overflow
- Removable Booster Seat
- External Safety Drain
- Hand shower Unit

SAFETY BATH COMES STANDARD WITH A HYDRO-THERAPY WHIRLPOOL SYSTEM

The Benefits of Whirlpool action are well documented. Many people with circulation problems, arthritis, sore muscles, and many other ailments have benefited from the use of Whirlpool bath.

Safety Bath uses LESS water than a regular bath tub.

Safety bars can be added as needed.
